

The Industry Leading...

## Horizontal/Vertical Test Plug HVTP-14

- 1.) **Horizontal and Vertical Testing Capabilities** – The industry’s only integrated horizontal and vertical test plug, which gives technicians both options for testing with one device.
- 2.) **Extended Comfort Handle** – Provides for a nice grip which makes it easier for technicians while inserting or removing test plug to and from the test switch.
- 3.) **Extended Length and Slim Design** – Added for safety to avoid opening or closing blades by accident while removing the test plug from the test switch while plates are stacked on top of each other.

---

The Horizontal/Vertical Test plug – HVTP-14 can be used on most switches on the current market, such as MPS’ Universal Test Switch and the FMS Test Switch\*.
